Preface

The papers included in this proceedings to be presented during the 10 workshops and the doctoral consortium to be held at the 18th Conference on Advanced Information Systems Engineering held in Luxembourg, 5–9 June, 2006. Altogether, the workshops and doctoral consortium have collected the work of 268 authors of 122 accepted long, short papers or position papers on the general theme of the conference: Trusted Information Systems.

The workshops will offer the possibility to learn and discuss a wide range of topics ranging from philosophical foundations of Information Systems (IS), Business-IT alignment and Business processes, to web services, ontologies and validation and verification of IS.

All CAiSE’06 workshop papers are included in these proceedings. Many of the proceedings of the workshops will additionally be published electronically through the CEUR Workshop Proceedings website, a publication service of Sun SITE Central Europe operated under the umbrella of RWTH Aachen University with the support of Tilburg University. You will find the various proceedings available by browsing on www.CEUR-WS.org.

Enjoy the workshops and doctoral symposium in Luxembourg! We look forward to see you there and we are strongly confident that this 18th CAiSE Conference will be highly successful for all of us.
